I am a customer oriented and organised software programmer, with a broad range of technical skills. I am meticulous and quick in assimilating complex information chunks relevant to a problem; decisive and efficient with the materials at my disposal. I intend to fill the gaps of specific needs which large-scale technological businesses fail to meet; solving the here-and-now issues with the skills I have retained from varied experience. I teach young talented minds as well.

EXPERIENCE

JUNE 2017 – MARCH 2018
FULL STACK DEVELOPER, ITAGTIP, ACCRA
Full stack web and mobile developer on the iTagTip app project.

NOVEMBER 2013 – PRESENT
